EDUCATION

- Nanjing University of Information Science & Technology,** 09/2022 – present
Bachelor of Electrical Engineering (Expected 2026)
- Score: 85.47 (Rank 4/35)
- South East Technological University** 09/2022 – Present
- Score: 73.24/100
 - Relevant Courses: Python Programming: OOP, data structures, automation scripts | Embedded Electrical Applications: FPGA, STM32, motor control | Industrial Automation: PLC, SCADA
 - Scholarship: **1st-class Scholarship** for the 2024-25 academic year, **1st-class Scholarship** for the 2023-24 academic year, and **2nd-class Scholarship** for the 2022-23 academic year.

PUBLICATIONS

- 3D Convolutional Network based micro-gesture recognition,** 30/07/2024
Congyue Zhang, Wenjie Fu, Canrong Tian, Xu Cheng, Yuan Tian, Hao Yu ✉
- First author of a paper on 3D-CNN-based micro-gesture recognition, published at ACM TURC 2024 (**international ACM conference**).
ISBN: 979-8-4007-1011-7, DOI: 10.1145/3674399.3674459

PROFESSIONAL EXPERIENCE

- World Meteorological Organization, ICT Service Management Intern** 07/2025 – Present | Geneva, Switzerland
- Supported an organization-wide Windows 11 migration with UNICC, upgrading **349+ devices** and validating **500+ assets**.
 - Optimized deployment efficiency by **34%** through Intune/Autopilot configuration and White Glove Update.
 - Enhanced system reliability and security compliance across WMO's **largest IT** modernization initiative.
- Progressive Chunyip (Tianjin) Co., Ltd, Automation Control Engineer Intern** 07/2024 – 08/2024 | Tianjin, China
- Optimized PLC+HMI automation across **13+ industrial devices**, enhancing system stability.
 - Redesigned control logic for a key production line, boosting **efficiency by 11%**.
 - Delivered **2 technical presentations**, aligning engineering and operations teams on process optimization.

PROJECTS

- Micro-Gesture Recognition using Skeleton Data and Deep Learning,** 04/2024 – present
Team Lead & Core Developer
- Led a **5-member team**, defining the technical roadmap and model architecture for micro-expression recognition.
 - Developed a 3D-CNN-based framework, achieving **6th place globally** in MiGA-IJCAI Challenge, improving accuracy by **15%**.
 - Explored applications in security & HCI, contributing to an **EI-indexed paper at ACM TURC 2024**.
- FPGA-Based High-Performance Image Acquisition & AI Acceleration,** 05/2023 – 10/2023
Team lead & Core Developer
- Led a **6-person team**, designing a real-time image processing system with **5 Gbps throughput**.
 - Implemented FPGA-based YOLO inference via **PCIe**, achieving **3× speedup and 36% power reduction**.
 - Reduced **latency by 47%**, enhancing real-time AI performance for industrial applications.
 - Secured **3rd place** in the highly competitive East China Regional Competition.

VOLUNTARY EXPERIENCE

- Student Ambassador, Team Leadership & Community Engagement** 12/2022 – present
- Managed **six departments with 52 members**, improving team coordination and operational efficiency.
 - Designed and executed **30+ campus events** (including reading salons and guest speaker sessions) to drive engagement.
 - Led a campus safety awareness campaign, reaching **10,000+ students in one month**, enhancing public awareness.
- Swimming Coach, User Training & Business Operations** 06/2023 – present
- 17 years** of swimming training experience, certified as a lifeguard and instructor, specializing in youth and adult coaching.
 - Designed personalized training programs, achieving an **85% renewal rate**, improving customer retention and satisfaction.
 - Independently managed a swimming training business, coaching **100+ students** and generating **¥10,000+ in one month**.
- University International Relations, Cross-Cultural Communication** 03/2023 – present
- Organized events for **the Irish ambassador** and officials from **Swiss and US international organizations**, ensuring effective communication and a seamless experience.
 - Planned and executed **six** international sessions, attracting **5,000+ attendees** and fostering cross-cultural engagement.

SKILLS

- | | | |
|--|--|--|
| Programming & Data
Python, Verilog/VHDL, C++, MATLAB | Embedded & Hardware
STM32, ESP32, FPGA(Quartus, Vivado, Pango), PCB Design(Altium Designer, Eagle) | AI & Tools
PyTorch, TensorFlow, OpenCV |
| Automation
3D printing (Fusion 360), PLC, SCADA, Industrial Networking | | |
